- SAP module implementation
- SAP Roll-outs
- Upgrades
- Support

### (b) Mid size enterprise solutions

- mySAP A1 Implementations
- mySAP A1 Support

### (c) Small Business Solutions

- SAP Business One – Implementation
- SAP Business One – Support

### (d) Other services mutually agreed upon

deliverables in the market, SAP announces timelines for the maintenance of the current versions, beyond which additional cost has to be incurred.

We offer three categories of upgrades for the global market:

1. Technical upgrade
2. Functional upgrade
3. Business enhancement upgrade

## SAP Support Systems

1. SAP Global Support
2. SAP Basis Support

## SAP Implementation

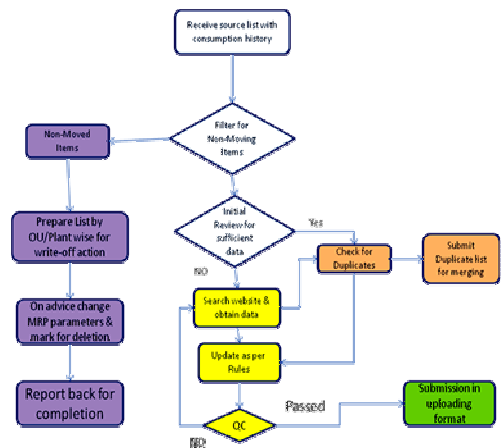

Avani carries a team of highly qualified and experienced consultants who are engaged in implementation of SAP. The scope of SAP implementation includes construction and setting-up a data center, identifying hardware and software requirements, procurement and installation of hardware and software, establishing network and connectivity facilities, facilitating the SAP licensing process, implementation, disaster mitigation, training and post-implementation support.

## SAP Rollout

Expansions in business requirements, in an established SAP implemented environment, calls for additional SAP licenses, configurations, customizations and support. Avani will study to have a complete understanding of existing business process mapped in SAP and the required business process that needs to be mapped during roll out. Avani will recommend improvements to existing SAP processes, including the upgrade to hardware and technology.

## SAP Upgrade

Enhancements in the product ranges as well as in the core technology are the regular features of SAP. Once they become

- Data processing/conversion
- Chat& Email Support
- Inbound/Outbound Sales
- Accounting & Finance
- Payroll Processing
- Invoice Processing

Avani delivers complete integrated solutions for BPO, including telephone systems, call-handling, web-design and virtual office. With an innovative and fresh look on business communications we understand the need to deliver robust and customized applications that add value to client business and operations

Avani is a leading service provider to the Data Processing. We undertake jobs for various agencies for Bulk Data Entry and Database processing as described above. Avani offers the best practices in the BPO spectrum and offers itself as a preferred partner. At Avani, we take utmost care to process your data according to your requirements, store and return it to you securely. We offer you the latest technology with Assured Quality and Quality System in place and at competitive price.

### Avani offers the following BPO services:

**Data processing/conversion:** This involves extracting data from printed and handwritten documents using electronic system. Converting data from one format to another. E.g. PDF to Word. Converting data on paper into desired electronic format. This involves manual data punching from printed and handwritten documents. It could be on web or local database. Collecting/slicing data and storing it in a predefined format [database] which can be used to produce useful reports.

**Chat& Email Support:** Providing customer support through Chat AND Email. And also Non-voice support being provided using chat tools.

**Inbound/Outbound Sales:** Corporate advertise their product in various mediums [print, air, internet etc]. Prospective customers respond to that advertisement and call centers try to fulfill the order.

**Accounting & Finance:** Managing a broad spectrum of accounting services, including Accounts Payable, Accounts Receivable, reconciliation & research, Billing, General Accounting and other accounting tasks.

**Payroll Processing:** The payroll of the client company is outsourced. The vendor takes care of the tax calculations, depositing the statutory dues with the appropriate Govt office(s).

**Invoice Processing:** Invoicing/ Billing, backend processing related to Billing/Invoicing. Cheque collections, monitoring, reporting.
